PROFESSIONAL SUMMARY

Full stack developer with 4 years of experience building scalable applications and leading technical teams. Expert in ReactJS, NextJS, Typescript, Node.js, AWS, and modern development practices. Helped customers create and action \$800K+ of savings plans at Compound. Proficient in using AI-assisted development tools, LangChain, LangGraph, and advanced prompting techniques for enhanced productivity.

EXPERIENCE

Lead Software Engineer

Compound LLC FZ, Dubai (Remote)

May 2025 - Present

- Led and Built entire product backend handling 10,000+ requests per minute using NodeJS, PostgreSQL, and AWS infrastructure
- Launched JavaScript based widgets for third-party seamless integration.
- AI automated flow: Created AI agents using LangChain, LangGraph, and also self hosted n8n with various workflows for lead generation and sales pipeline.

Software Engineer

Skugal Tech, Delhi NCR (Remote)

February 2022 - April 2025

- Delivered 5+ major projects including Tokenmetrics, Platodata, and Clarks with data visualization focus, serving 50,000+ active users
- Optimized system performance by 40% by implementing Redis caching and AWS Lambda functions, reducing server costs by 30%
- Built scalable backend APIs handling 5,000+ concurrent users with 99.8% uptime using Node.js and AWS services

Software Engineer

Kudos Finance and Investment Pvt Ltd, Pune, India

October 2021 - January 2022

- Developed financial applications using MERN stack with secure payment integrations, processing 1,000+ transactions daily
- Implemented Git workflows for efficient version control and collaboration, reducing deployment time by 50%

PROJECTS

Compound

May 2025 - Present

- Architected complete system using ReactTS/NextTS frontend, NodeJS backend, PostgreSQL database, and AWS infrastructure (EC2, S3, Lambda, RDS)
- Integrated self-hosted n8n using Docker for AI workflow automation and created embeddable widgets for third-party integration
- Integrated ActiveCampaign for email marketing, Prelude for SMS OTP setup, mixpanel for user behavior analytics, and many more tools

Shoorah (Contract Work)

February 2025 - May 2025

- Developed full-stack mental health application using React.js frontend, Node.js backend, and MongoDB database

- Built comprehensive wellness features including self-assessment tools, instant support chat, and multi-user authentication with JWT

DebitMyData

December 2024 - April 2025

- Created AI-powered NFT marketplace using NextJS frontend, NodeJS backend, Python3 for AI processing, and AWS services (Lambda, S3, DynamoDB)
- Built automated NFT creation and sales functionality with AI agents executing tasks based on user instructions

Revitpay

June 2024 - December 2024

- Built scalable data processing platform using React.js frontend, Node.js backend, AWS Textract for OCR, Lambda for processing, S3 for storage, and DynamoDB for metadata
- Processed 100,000+ documents including PDFs and images with 95% accuracy using AWS Textract integration

Clarks

March 2023 - May 2024

- Developed backend automation using AWS Lambda and Step Functions to convert retail product information into JSON format
- Built automated data processing pipeline handling 50,000+ product records with 99.5% accuracy

Tokenmetrics

February 2022 - February 2023

- Developed backend automation services using Node.js and Express.js for live cryptocurrency pricing and watchlist functionality
- Built responsive React.js UI application with real-time data updates and integrated Mixpanel for user behavior analytics

Skugal ERP

February 2022 - February 2025

- Managed comprehensive school data systems using Firebase ecosystem (Firestore, Authentication, Cloud Functions) and AWS Lambda
- Developed scalable backend APIs using Node.js and Express.js, serving 5,000+ students and staff members
- Integrated CashFree payment solutions processing 2,000+ monthly transactions for school fees and services

TECHNICAL SKILLS

AI & Development: LangChain, LangGraph, AI-assisted IDEs (Cursor, GitHub Copilot), Advanced Prompting, AI workflow automation

Programming Languages: JavaScript, Python, Java, TypeScript, HTML, CSS

Frontend & Backend Technologies: React, NextJS, HTML, CSS, Bootstrap, Node.js, Express.js, RESTful APIs, PostgreSQL, MySQL, DynamoDB, Firebase,

Cloud & DevOps: AWS (Lambda, S3, EC2, Textract, RDS), Docker, CloudFormation, Firebase, MongoDB

Tools & Technologies: Git, Redis, n8n, Mixpanel, Payment Integration, JWT

EDUCATION

Bachelor of Engineering (Electronics and Telecommunication)

College of Engineering, Pune

2017 - 2021 | Grade: 74.86%

CERTIFICATIONS & ACHIEVEMENTS

Full Stack Web Development Bootcamp - Newton School (2021)

College Best Athlete - Multiple gold medals
